

Evan Cortez

Software Engineer · Owns frontend & DevOps · Billing systems · AWS

Provo, UT · (385) 309-7718 · evanvcortez@gmail.com · evancortez.me · github.com/evcgit · linkedin.com/in/evan-cortez

SUMMARY

Software engineer on a 3-person team at Right Angle Engineering—I own the frontend and DevOps, with heavy influence on the backend. Last 12 months: a custom bidding and invoicing system that now runs ~70% of company MRR (and growing), per-company billing cycles, Stripe collections, financial analytics dashboards, and a Three.js tool that turns architectural drafts into 3D models for structural analysis. Measures success in cash collected, hours saved, and systems people rely on every day.

EXPERIENCE

Full-Stack Software Engineer

Jul 2024 – Present

- Right Angle Engineering · 3-person eng team · owns frontend and DevOps; heavy backend influence
React · TypeScript · React Query · Python / Django REST · MySQL · Stripe · Three.js · AWS CDK · ECS · ALB · S3 · Docker · GitHub Actions · Jest · PyTest
- Designed and shipped the custom bidding and invoicing system that now accounts for ~70% of company MRR (and growing) —per-customer pricing catalogs, bid→invoice APIs/UI, and custom billing cycles so each company can run on its own commercial calendar
 - Built Stripe payment flows (PaymentIntents, Autopay, settlement jobs, failed-payment alerts) so collections follow work approval, not a spreadsheet chase
 - Built analytics dashboards used for company financial analysis—MRR, collections, and commercial performance
 - Owned portal-to-API intake integrations that cut ops time ~50%; cut API traffic ~66% and made the heaviest screens ~3× faster
 - Building a Three.js tool that converts architectural drafts into 3D models for structural analysis, then outputs structural drafts
 - Own DevOps: Docker, ECS/ALB zero-downtime deploys, GitHub Actions, production tests in Jest and PyTest; primary day-to-day technical mentor for a software intern

Project Manager → Software Engineer

Feb 2024 – Jul 2024

- Right Angle Engineering
- Coordinated high-volume client intake; promoted after independently shipping internal full-stack tools that removed the bottlenecks

Market Manager

Jun 2022 – Oct 2023

- Solcius · Residential solar operations
- Led a 10-person operations team through 200+ installations; improved internal processes ~30%—the workflow intuition behind later engineering work

PRODUCT

BidzBase — Founder / Builder

2025 – Present

- Production multi-tenant SaaS for subcontractors · bidzbase.com
React · Django · PostgreSQL · Redis · Stripe Billing + Connect · Docker · AWS
- Shipped estimate → proposal → accept/decline → invoice → get paid, plus scheduling, time tracking, analytics, roles, and email—desktop and phone—from idea to real users in ~1 month

SKILLS

Frontend	React, TypeScript, Next.js, React Query, Three.js, MUI, CSS, HTML
Backend	Python, Django REST Framework, Node.js, REST APIs, Git, Jest, PyTest
Data	PostgreSQL, MySQL, Redis
Cloud / DevOps	AWS (ECS, ALB, S3, Secrets Manager, CDK), Docker, Nginx, GitHub Actions CI/CD
Payments	Stripe Billing, Connect, PaymentIntents, Autopay, invoicing, custom billing cycles
Also	Puppeteer, S3 uploads, GraphQL (Linear automation), Cursor / Claude / ChatGPT

EDUCATION

- Mountainland Technical College — Web Development Certificate Completed 2024
Utah Valley University — B.S. Information Systems (coursework; ~3 semesters remaining) Coursework
